■ FRONG — We Jump Wrong but Land Rich

The most accidentally successful frog in crypto history.

1. INTRODUCTION — "A Jump Gone Right"

FRONG wasn't supposed to exist.
It started from a typo — someone meant to type "frog" in a meme chat about PEPE, but fate had other plans.
From that typo, a legend was born: FRONG, the frog who always jumps in the wrong direction… but somehow lands right where the profits are.
"In crypto, mistakes are art. FRONG is that art."

2. MISSION

FRONG represents chaotic luck — the belief that success in the meme world isn't about perfection, but about pure, ridiculous timing and community energy.

Our mission:
• Spread laughter and luck.
• Build a meme empire where "wrong" is the new "right".
• Reward loyal jumpers who believe in the Wrong Way Meta.
